Hello Inspector D'Aoust,

Mathieu sent me your email and we have just verified with our legal services and they have provided the following:

1. The NCC Traffic and property regulations do not address the storage of flammable liquids or compressed gaz. It is my understanding that the Ottawa Fire Department responds to fires on NCC properties. In addition third party users are required to follow municipal bylaws and a great example of this are

restaurants and special events on NCC lands (Jazz Festival and Bluesfest) that are subject to food, health and fire inspections.

2. It is the conclusion of our legal staff that any safety regulations which are not covered by our regulations or federal legislation, fall to the municipal or provincial jurisdictions. The Ottawa Fire Department has in fact authority in this instance to ensure that the installations do not pose a health and safety risk to the residents of Ottawa.

We would appreciate if you could kindly share this information to your counterpart at the Fire Department.

Thank you for your cooperation in this matter.

Mathieu or I are available should you have any additional questions.

Hi Mathieu, as per our conversation, I would like to know if the NCC can enforce any regulations in regards to the storage of compressed gas cylinders, flammable liquids or combustible liquids in Confederation Park. Ottawa Fire advised that they cannot enforce on Federal Land. Any information would be greatly appreciated.

Thank you

François D'Aoust
